A Few Novelties and Specialties in Flower Seeds for Fall 1935

New Rust Proof Snapdragons

Without doubt the most valuable introduction of late. Plant breeders have been at work for many years trying to perfect a strain of Snapdragons immune to the rust. This new strain will produce plants 75 per cent or more rustproof.

Belle of California. Rosy-pink, white tube.

California Supreme. Canary yellow.

Sierra Snow. Pure white.

Campfire. Pure luminous scarlet.

Loveliness. Pure soft rose-pink.

Bronze Shades. Bronze and copper shades.

Crimson. Deep rich crimson.

Rustproof Mixed. All shades mixed.

Per Pkt., 25c; 5 Pkts. for \$1.00.

Cineraria, California Giants

The very best strain of Cineraria yet produced. The plants are of good compact habit producing immense flowers often four inches or more in diameter. The colors range through various shades of blue, salmon pink, old rose, blood red and white. Pkt., \$1.

Aquilegia longissima

This beautiful Columbine from the mountains of Arizona introduced by us in 1928 has become quite popular here and has also created quite a sensation in England. The flowers are clear yellow with slender spurs that often measure 4 inches in length. A very desirable plant for a shady or partially shady place. Pkt., 50c.

Primula malacoides, Dawn

Of the many varieties of this popular plant developed during late years this is without doubt the best of all. The flowers are larger than the ordinary type and of an entirely new shade, being a brilliant salmon pink. A fine subject for pot culture or for a shady place in the garden. Pkt., 25c.

Blue Dawn-Flower (Ipomoea leari)

Years ago this beautiful perennial morning glory was quite generally planted but of late for some reason it has almost disappeared from our gardens. One of the very best evergreen vines for Southern California. It thrives with scarcely any water or care and blooms for the greater part of the year. It makes a dense mass of foliage and produces great quantities of large, clear blue flowers. A splendid vine for covering fences, buildings, steep banks, etc. The vines very seldom produce seed in Southern California and we have been unable to secure any for several seasons. This year however we were fortunate enough to have one vine in our grounds which has set a fair quantity of seed and we are glad to be able to offer it to the public. Pkt., 25c.

Early Hybrid Brompton Stock, Harbinger

This wonderful new stock introduced by us a few seasons ago from England is meeting with great favor in this country. We consider it one of the finest introductions of late years. Early and free flowering with a wide range of colors and a high percentage of double flowers. Pkt., 50c.

Godetia, Sybil Sherwood

An entirely new shade in Godetias being a bright salmon-pink softened by an undefined edging of white. Plants grow about 20 inches high and make a splendid display in the garden. Received an Award of Merit from the Royal Horticultural Society of England. Pkt., 25c.

New Larkspur, Rosamond

A new and distinct color in the Tall Stock Flowered Larkspurs being a pure bright rose. The plants grow to about 4 feet in height and come into flower about two weeks earlier than the other varieties of this group. Excellent for cutting purposes. Pkt., 25c.

New Larkspur, Blue Bell

A new color in the California Giant Larkspurs being a clear light blue. Very desirable as a cut flower and makes a fine display in the garden. Pkt., 25c.

Chrysanthemum mawii

A beautiful perennial Chrysanthemum with rich pink, single flowers and silvery foliage. Grows 10 to 12 inches high and is an excellent subject for borders and rock gardens. Pkt., 25c.

Campanula grossekii

Perennial with spreading root system soon making large clumps. Plants grow 1½ to 2½ feet high with long spikes of violet blue flowers. Makes a splendid display in the garden, the plants blooming almost continuously through spring and summer. The best Campanula for Southern California. Pkt., 25c.

Verbena Royal Bouquet

A splendid new type, plants of upright growth 15 to 18 inches high producing very large flowers with a wide range of beautiful colors. Pkt., 25c.

Calendula, New Art Shades

Contains many delicate tones and shades new in Calendulas; cream, yellow, apricot, buff to deep orange. Very attractive for planting in masses. Pkt., 25c.

Venidium fastuosum hybrids

Many new and beautiful shades in this popular flower. The colors include apricot shades, pure white, cream color, canary yellow, salmon shades, golden yellow and deep orange. Pkt., 50c.
